DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Schlecht (5,999,417).

Schlecht disclose a high efficiency power converter in Figs. 1- 10. A primary winding (T1pri and T2pri), secondary winding (T1sec and T2sec), tertiary winding (T1ter and T2ter), the primary winding are connected to switches (Q1 and Q2), current fed inductor (L), synchronous rectifier (Q3 and Q4). Fig. 3 teach the controlled rectifier and parallel uncontrolled rectifier, while Fig. 5 shows the same topology as Fig. 3 but with several parasitic capacitances and inductances, see col. 7, line 53 to col. 9, line 57. Fig. 8 teaches the output is regulated by controlling the voltage applied to the control terminals of the controlled rectifiers and a controller circuit (a regulator which regulates the output while the fixed duty cycle is maintained). See col. 13, line 51 to col. 14, line 64.
